## **Business Outlook**

The Group has achieved growth in its ICE segment for three consecutive quarters in the financial year due to its widened customer base and product portfolio. There are signs of subdued growth that CE segment is recovering from the previous six months due to the launch of new products by one of the CE customers.

While there are signs of a recovery in the global economy, the Group will closely monitor how its customers react and capture additional opportunities. Nevertheless, it continues to expect recurring operational challenges, such as cost and wage pressures in the PRC. As always, the Group will continue to remain vigilant in its monitoring of market developments and will continue efforts to improve its fundamentals, including its design and development capabilities, production efficiencies and inventory management.

Barring unforeseen circumstances, the directors expect the Group to achieve strong growth in profitability for the financial year ended 31 March 2014.

End.
